

POWERFUL 3-D PERSPECTIVE TECHNOLOGY

The **XR3D-6** is an easy to operate, single or dual source scanner that provides operators with extremely detailed, more revealing images, enhanced detection capabilities and a very low cost of ownership.

With a tunnel opening of 24.2" wide by 16.7" high (615 mm x 425 mm), the XR3D-6 is the ideal solution for a variety of usages such as for critical infrastructures, transportation and border operations where screening of parcels and bags is required.

VOTI's scanners employ innovative new feature sets to deliver exceptional threat detection capabilities. Through an advanced ergonomic interface, operators can manipulate and enhance scanned images in a variety of ways to better pinpoint and evaluate potential threats. The overall threat detection process is enhanced automatically, by a suite of software guided tools and feature sets, including extended, configurable threat libraries.
